
Day 1

Completed lesson 2 and 3

Concepts learnt:

- Learnt about **EntraID**, Microsoft's cloud identity and access management system
- Learnt about the different types of Entra ID that a user can login with.
 - EntraID Registration: There is less trust since it is made for devices that are not corporate owned.
 - EntraID Join: This is deployed on the corporate device and manages the identities for the cloud.
 - EntraID Hybrid Join: This joins the existing Active on-premise directory and the EntraID solution provided. It requires the corporate version of windows.

Concepts to explore:

- [Identity of EntraID from Microsoft](#)
- [Device Join Plan from Microsoft](#)
- [Hybrid Join from Microsoft](#)
